- Seong-ja Garza, Sea Mar
- Kathy Kain, Evergreen Recovery Services
- Jason Wuori, Snohomish County
- Michael White, PEMBHI
- Martyna Madej, VOA

### North Sound Behavioral Health – Administrative Services Organization (North Sound BH-ASO) Staff Present:

- Jennifer Whitson
- Eddie Wai

#### 1. Data Dictionary

- a. For the most part the DD is what the State's DD is.
- b. DCR Investigation - Discussing the best way to monitor the Emergent/Non-Emergent ITA investigations. Place of service determines this. Thoughts are to join the service to the Investigation or to have the place of service (Face to Face with the client for the investigation) as a field in the DCR investigation.
- c. MC – new transaction will be used to capture Crisis contact episode type information when there is not a detainment – sounds like the ICRS Voluntary Transaction previously used by the NS. The ICRS vol trans was never transmitted to the state – and it may be that this new transaction is very similar to the ICRS vol trans and the data may already be captured in the Provider EMRs
- d. Demographic
  - i. Reviewed Ethnicity not being in the transaction, but Race.
  - ii. P1ID as an additional element
  - iii. Primary Language – since the option is available to have a smaller list – we will.
- e. Authorization Status Replies and modifications
  - i. For approved authorizations NS will be submitting updated records to providers when there is a void to the auth or a change to the Start/End date or level of care approved.
- f. Delay in publishing until the first week of March – after the determination of the Vendor/process/software for the MCOs capture data for the state. Last week's update was that this would be determined by the end of this month (February).

#### 2. Q&A log for the HCA Supp Transactions for 2020

- a. An update will be sent when the next copy comes out – there were a couple of meetings last week, so we are expecting some more answers to be posted.

### Next Meeting

The next meeting is Friday, March 13<sup>th</sup> 1pm
