

- I. Duplicate Services and the XE modifier
 - a. Update expected next week.
 - b. Aware that we are coming up on the one-year mark where services would become too old to submit.
 - c. NS will forward the information when it is received
- II. Data Dictionary and discussion
 - a. Tables include the authorization reply and Authorization Revision reply codes. The actual reply table is not in the Data Guide, so the table codes appear to go nowhere.
- III. Authorization Transaction via EDI rather than Access Database
 - a. July – the EDI version of the Non-Medicaid authorization will be implemented. When you are ready for testing put your file in the SFTP testing inbound folder and notify us that it is ready.
 - b. Requiring address transaction '022.03' for July 1
 - i. The address for the client is necessary for us to communicate authorization request outcomes to the client in a letter format.
- IV. Beacon – survey
 - a. Beacon was chosen as the entity to work with the five MCO's for submitting the supplemental data to the state. They are working on finalizing their product and timelines.
 - b. NS will forward the minutes from the last meeting and a survey link from Beacon
 - i. Complete the survey for each Provider – or more than once if the facility operates separately and is at a very different level of readiness and will be submitting data as a different NPI

Next Meeting June 12th, 1pm
