

North Sound Behavioral Health – Administrative Services Organization (North Sound BH-ASO) Technical Call

Scheduled 2020-12-17

Agenda

1. Supplemental Data
 - a. New Transaction 981.00 Auth Revision will be used to request a change to an Approved Authorization. The changes types include the Start Date, End Date or to fully retract the auth request from our system. We have a draft ready and hope to have the completed transaction out to providers in the next two weeks. Along with the Transaction will be rules and reasons around using the transactions. Discussion followed.
 - b. Program ID only for those with a Program. The Service Episode is the main transaction that shows us there is a client with an episode of care. For the Program ID Transaction when the Program ID is not contained in the list then there is no reason to submit the Program ID Transaction. There may have been some confusion as the Beacon system requires the Program ID as part of their Transaction.
2. Table Updates
 - a. No updates currently.
3. SERI Updates
 - a. If you have not received a draft of the IMC_SERI – please contact us so we can be sure you get a copy. The next SERI is expected around February.
 - b. 99201 voided – use 99202. 9920# - don't use add-on codes with these CPT codes. 99417 prolonged service code. A new code– not on fee for service side – need to check rates and decide to add or not.
4. Data Dictionary Clarification
 - a. None currently.
5. MCR - Dispatch, Event Start
 - a. All Crisis Contacts have the MCR and the DCR is a separate transaction. Discussion had and call will be scheduled with Compass' EMR vendor and NS to review the elements

Schedule

General schedule is the 2nd Friday of each month at 1pm
